IPs	192.168.1.100, 185.199.108.153
Emails	attacker@evil.com

Conclusion

The malware sample was successfully analysed. Indicators of Compromise (IOCs) were extracted and correlated with simulated blockchain intelligence. CryptoTraceX classified the sample according to detected wallets, URLs, IP addresses and email addresses. This report can be used for cyber threat intelligence and digital forensic investigations.
